

## News Release

**MARKET SENSITIVE INFORMATION**  
**EMBARGOED UNTIL: 11:00am (US EASTERN TIME) 3 June 2011**

# JPMorgan Global Manufacturing & Services PMI™

Produced by JPMorgan and Markit in association with ISM and IFPSM

## Global economic growth improves in May, as faster expansion in services offsets slowdown in manufacturing

May PMI™ data signal a slight improvement in the rate of expansion of the global private sector economy. The **JPMorgan Global All-Industry Output Index** posted 52.6, up from April's 21-month low of 51.8. Global output has risen throughout the past 22 months. The underlying trend is still one of slower growth than at the start of the year, as the average index reading so far in Q2 2011 (52.2) is well below that for Q1 (57.3).

Manufacturing continued to lead the recovery, despite seeing output growth slip to a near two-year low. Service sector activity rose at a slightly faster pace than in April.

National data pointed to slower rates of expansion in the US, the Eurozone, the UK and India during May. The cooling in the US mainly reflected a sharp easing in growth of manufacturing output (to a near two-year low) following a sharp slowdown in the non-manufacturing sector seen during April.

Rates of expansion gathered pace in both China and Brazil, and held steady at a solid pace in Russia. Although Japan remained in contraction territory, the rate of decline was substantially slower than during the earthquake-affected months of March and April.

The rate of expansion in the Eurozone slipped to a five-month low, with growth slowing in all of the euro area member states for which data are collected. The recovery also remained lopsided, with strong expansions in France and Germany contrasting with only slight increases in Italy, Spain and Ireland.

The UK saw output growth moderate further in May. The expansion of service sector business activity slowed again, but the main weak point was manufacturing production – which declined slightly for the first time since May 2009.

At 53.0 in May, the **Global All-Industry New Orders Index** rose from April's 21-month low of 51.4. The rate of expansion was modest and weaker than the average for the current sequence of increase which began in August 2009.

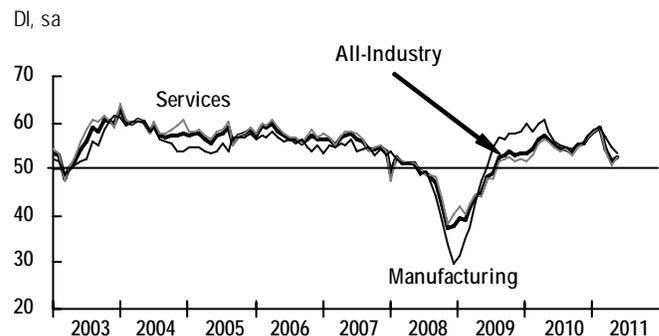

**Employment** rose for the fourteenth month in a row during May, with job creation seen in both the manufacturing and service sectors. Staffing levels rose in the US, the Eurozone, China, the UK, India, Brazil and Russia. Within the euro area, jobs growth continued in Germany, France and Italy, whereas losses were seen in Spain and Ireland. Japan also reported a reduction in payroll numbers.

**Cost inflation** eased for the third month running in May, to its lowest level since last November. Rates moderated in both the manufacturing and service sectors. Cost inflation slowed in the US, the Eurozone, China, Japan, the UK, India and Russia, but accelerated in Brazil.

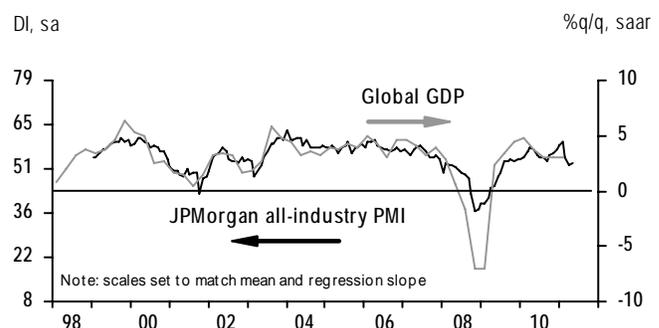

**Commenting on the survey, David Hensley, Director of Global Economics Coordination at JPMorgan, said:**

"Growth of the global economy showed a slight improvement in May, although this mainly reflected a slight bounce in the service sector following March's sharp easing. The underlying trend remains consistent with the recovery entering a softer growth phase, especially as manufacturing slowed further. Job creation continued, but sustaining this may be dependent on output and demand firming in the coming months."

JPMorgan global PMI output

### Notes to editors

The Global Report on Manufacturing & Services is compiled by Markit based on the results of surveys covering over 11,000 purchasing executives in almost 30 countries. Together these countries account for an estimated 83% of global GDP. Questions are asked about real events and are not opinion based. Data are presented in the form of diffusion indices, where an index reading above 50.0 indicates an increase in the variable since the previous month and below 50.0 a decrease.

**J.P. Morgan Chase & Co.** is a leading global financial services firm with assets of \$803 billion and operations in more than 50 countries. The firm is a leader in investment banking, financial services for consumers and businesses, financial transaction processing, investment management, private banking and private equity. A component of the Dow Jones Industrial Average, JPMorgan Chase is headquartered in New York and serves more than 30 million consumer customers nationwide, and many of the world's most prominent corporate, institutional and government clients. Information about JPMorgan Chase is available on the internet at [www.jpmorganchase.com](http://www.jpmorganchase.com).

**Markit Economics** is a specialist compiler of business surveys and economic indices, including the *Purchasing Managers' Index™ (PMI™)* series, which is now available for 32 countries and key regions including the Eurozone. The PMIs have become the most closely-watched business surveys in the world, favoured by central banks, financial markets and business decision makers for their ability to provide up-to-date, accurate and often unique monthly indicators of economic trends. To learn more go to [www.markit.com/economics](http://www.markit.com/economics).

Founded in 1915, the **Institute for Supply Management™ (ISM)** is the largest supply management organization in the world as well as one of the most respected. ISM's mission is to lead the supply management profession through its standards of excellence, research, promotional activities and education. ISM's membership base includes approximately 40,000 supply management professionals with a network of domestic and international affiliated associations. ISM is a not-for-profit institute that provides opportunities for the promotion of the profession and the expansion of professional skills and knowledge.

The **International Federation of Purchasing and Supply Management (IFPSM)** is the union of 42 national purchasing associations worldwide. Within this circle, about 200,000 purchasing professionals can be reached. IFPSM is a non-political, independent and non-profit oriented international organisation, registered in Aarau, Switzerland. IFPSM facilitates the development and distribution of knowledge to elevate and advance the procurement profession, thus favourably impacting the standard of living of citizens worldwide through improved business practices.
